SEC 5/B , B.S.CITY

FINAL REVISION ASSIGNMENT 2019-20

CLASS : VII

SUBJECT : ENGLISH

SECTION A ( READING)

**Read the passage given below:**

Garbage is a great environment hazard. It comes from various sources such as used paper, tiffin packing, plastic bag, ice cream wrappers, bottle caps, fallen leaves from trees and many more. Garbage makes the premises ugly, unkempt and breed diseases.

A lot of trash that is thrown away contain materials that can be recycled and reused such as paper, metals and glasses which can be sent to nearest recycling centre or disposed of to the junk dealer. It also contains organic matter such as leaves which can enrich soil fertility. A compost pit can be made at a convenient location where the garbage can be placed with layers of soil and an occasional sprinkling of water. This would help decomposition to make valuable fertilizer. This would also prevent pollution that is usually caused by burning such organic waste.

**Answer these questions:**

- Where does garbage originate?
- How can garbage create havoc for mankind?
- What happens to the disposed material at recycling centre?
- How are fallen leaves useful?
- What are compost pit?
