

DAILY BASIS ASSIGNMENT

DAY: FRIDAY

CLASS: V

DATE: 24.4.2020

SUBJECT: ENGLISH

I. Read the following passage carefully and answer the MCQs given below.

Bees are insects. Bees are special insects because they can fly! They can move through the air like an aeroplane! Bees can fly because they have wings. They use their wings to fly. Bees can fly fast. Bees can also fly slowly. They can fly up and they can fly down. They need to fly to get to the flowers. Bees can have three colours. They can be yellow, red and orange. All bees are black in some places. Bees have three main parts. They have a head. They have a body. And they have a stinger. The stinger is used to defend against enemies. They also have six legs. They use their legs to climb and stand. They also use their legs to eat and collect pollen. Bees live in many places. They live in Africa, Australia, Asia, Europe, North America and South America. The only continent that bees don't live on is Antarctica! I understand why they don't live in Antarctica. It's too cold! Most of the times, bees are nice to humans, if you don't bother them, they will not bother you. Have fun watching bees this summer.
